STORAGECRAFT®
SHADOWPROTECT® 5
IT EDITION

Unlimited Disaster Recovery, Data Protection, and System Migration for All Windows Systems

Back Up Systems Without Installing Software

Managing and maintaining business systems that are always changing can be overwhelming. Simply introducing new software into a computing environment can throw the entire business into chaos, if you aren't careful. IT professionals need a tool at their disposal that will help them protect valuable business systems and their data, without adding new headaches to system administration.

StorageCraft® ShadowProtect® IT Edition provides you with unlimited disaster recovery, data protection, and system migration for every Windows system in your IT environment, without installing any software. It also can back up everything on a system—including the operating system, applications, services, and data. Part of the StorageCraft® Recover-Ability™ solution, ShadowProtect IT Edition is a tool that helps IT professionals recover any Windows server, desktop, or laptop. The StorageCraft Recover-Ability solution allows you to recover anytime, anywhere. Which means you can keep business running after any disaster—great or small.

ShadowProtect IT Edition is unique because you can use it to back up and recover an unlimited number of servers, desktops, and laptops based on its unique, subscription-based model. Purchase ShadowProtect IT Edition for two weeks, one month, three months, or an entire year. It is preloaded to a USB key, so it's part of your IT toolkit when you need to back up or restore any Windows system. You don't need to install software to use it.

When you are planning a system change, ShadowProtect IT Edition is ideal because it gives you an extra level of insurance that a truly reliable backup provides. It's also perfect for system migrations or system upgrades—whether you're moving to a new version of Windows, brand new physical hardware, or to a virtual machine.

ShadowProtect IT Edition Has These Benefits:

- Bare metal recovery of Windows servers, desktops, and laptops in minutes.
- Support for new operating systems and technologies, including Windows Server 2012, Windows 8, UEFI systems, and GPT disk partitions.
- Restore backup images to or from physical and virtual machines.
- Migrate backup images to new systems (physical or virtual) with StorageCraft Hardware Independent Restore™ technology .
- Move everything from one disk to another with disk copy feature.
- Back up systems without installing any software.
- Recover individual files and folders in moments.
- Use on an unlimited number of servers, desktops, and laptops during your subscription period.

STORAGECRAFT®
Backup Fast, Recover Faster

ShadowProtect IT Edition Features

Backup—Back up Windows servers, desktops, or laptops. Capture everything on a system: operating system, applications, and data. Use the disk copy feature to make an exact duplicate of a disk.

Recovery—ShadowProtect IT Edition allows you to quickly recover systems, including bare metal recovery. Use StorageCraft Hardware Independent Restore technology to recover to dissimilar hardware or even virtual systems.

File and Folder Recovery—Quickly browse to specific files and folders in your backup images to quickly recover your file-level data.

Unlimited Use—With your ShadowProtect IT Edition subscription, you can back up an unlimited number of servers, desktops, and laptops.

System Migration—ShadowProtect IT Edition allows you to migrate any ShadowProtect backup image file to new hardware or even to a virtual system.

No Software Installation Required— Perform backups, recover your entire system or just one file or folder, and migrate to new hardware— even virtual hardware—without ever having to introduce new software into your IT environment.

Hardware and Platform—Supports Windows Server 2012 and Windows 8, as well as modern storage technologies such as GPT and UEFI partitions, and large-block disks (LBD). Also includes support for VMware, Microsoft Hyper-V, Citrix XenServer, Oracle VirtualBox, and RedHat KVM/RHEV hypervisors.

The Perfect Tool for Your IT Toolbox

There are a number of ways you can use ShadowProtect IT Edition. Here are some of the more common scenarios:

- Quick backup before starting any new project or making a system change;
- Upgrading to a new version of Windows (server or desktop);
- Migrating to new hardware—including virtual systems;
- Electronic discovery (e-Discovery);
- Computer forensics;
- Restoring to bare metal.

Save Time

Perform quick backups of any Windows system—servers, desktops or laptops—before beginning any new project.

Save Money

Back up and recover an unlimited number of systems during your subscription period.
