SHADOWPROTECT ®

IT EDITION *PRO*

Unlimited Disaster Recovery, Data Protection for Windows Systems and Exchange Servers

Backup Systems without Installing Software

Managing and maintaining business systems that are always changing can be overwhelming. Simply introducing new software into a computing environment can throw the entire business into chaos, if you aren't careful. IT professionals need a tool at their disposal that will help them protect valuable business systems and their data, without adding new headaches to system administration.

StorageCraft® ShadowProtect® IT Edition PRO provides you with unlimited disaster recovery, data protection, and system migration for every Windows system in your IT environment, without installing any software. In addition to protecting all of your Windows systems, ShadowProtect IT Edition PRO also gives you unlimited granular recovery of email messages and mailboxes for every Exchange server you support.

Part of the StorageCraft® Recover-Ability™ solution, ShadowProtect IT Edition PRO allows you to back up everything on a system, including the operating system, applications, services, and data—and then save that backup to an external storage device. The StorageCraft Recover-

Ability solution allows you to recover anytime, anywhere. Which means you can keep business running after any disaster—great or small.

ShadowProtect IT Edition PRO is unique because you can use it to backup and recover an unlimited number of servers, desktops, and laptops based on its subscription-based pricing. Because it includes StorageCraft Granular Recovery for Exchange, you can quickly recover email messages and entire mailboxes from Exchange Database (EDB) files. This award-winning, best-in-class technology also allows you to search mailboxes and email messages based on criteria you specify.

ShadowProtect IT Edition PRO is also perfect for system migrations or system upgrades—whether you're moving to a new version of Windows, brand new physical hardware, or to a virtual machine.

ShadowProtect IT Edition PRO has these benefits:

- Windows Server 2012, Windows 8 and Microsoft Exchange support.
- Rapid file and folder recovery.
- Granular recovery of mailboxes and email messages from Exchange EDB files.
- Bare metal recovery of Windows servers, desktops, and laptops in minutes.
- Ability to restore backup images to or from physical and virtual machines.
- Migration to new systems (physical or virtual) with StorageCraft Hardware Independent Restore™ technology.
- Ability to search mailboxes, email messages, or entire Exchange databases for specific keywords.
- Unlimited use during your subscription period.

STORAGECRAFT

Backup Fast, Recover Faster

ShadowProtect IT Edition PRO Features

Backup—Backup Windows servers, desktops or laptops. Capture everything on a system: operating system, applications and data. Use Disk Copy to make an exact duplicate of a disk.

Recovery—ShadowProtect IT Edition PRO allows you to quickly recover systems. Use StorageCraft Hardware Independent Restore (technology to recover to dissimilar hardware or even virtual systems.

File and Folder Recovery—Browse to specific files and folders in your backup images to quickly recover your file-level data.

Email and Mailbox Recovery—Easily restore mailboxes, email messages, or email attachments by dragging and dropping them from your Exchange backup to your production server or a PST file.

Email and Mailbox Search—Minimize the time required to search your Exchange database by using the StorageCraft Granular Recovery for Exchange search tools to find email messages based on keywords, message dates, senders, recipients, or subject matter.

System Migration—ShadowProtect IT Edition PRO allows you to migrate any ShadowProtect backup image file to new hardware or even to a virtual system.

Unlimited Use—With your ShadowProtect IT Edition PRO subscription, you can backup an unlimited number of servers, desktops, and laptops.

No Software Installation Required—Perform backups, recover your entire system or just one file or folder, and migrate to new hardware—even virtual hardware—without ever having to introduce new software into your IT environment.

The Perfect Tool for Your IT Toolbox

There are a number of ways you can use ShadowProtect IT Edition PRO. Here are some of the more common scenarios:

- Quick backup before starting any new project or making a system change;
- Upgrading to a new version of Windows (server or desktop);
- Migrating to new hardware—including virtual systems;
- Electronic discovery (e-Discovery);
- Computer forensics;
- Restoring to bare metal.
